DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 21-28, drawn to an electrode, classified in class 429, subclass 218.1.
 - II. Claims 37-40, drawn to a cathode, classified in class 429, subclass 221.
2. The inventions are distinct, each from the other because of the following reasons:

Group I is drawn to an electrode which cannot be formed by a thermal spray process while Group II is drawn to a cathode, which cathode is formed by thermal spraying. Thus the two groups are directed to different electrode materials.

This restriction requirement is being made because of the above new reason for proper restriction between the two groups.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

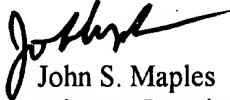

Art Unit: 1745

application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
